SUMMARY

Product Designer with 5+ years of experience in B2C and B2B products — VPN apps, a freelance marketplace, and a financial analytics platform. Good at working with large and complex interfaces. Understand accessibility and localization. Find problems independently, use data to support decisions, and communicate directly with C-level and PMs about priorities.

EXPERIENCE

NDA — VPN Product · Senior Product Designer

May 2024 — Present

- Responsible for design of the VPN app on desktop, mobile, and browser extension — 10M+ users in B2C and enterprise
- Found WCAG problems in the interface, prepared a report for C-level, and changed the font from Montserrat to Noto Sans — the product now works correctly in 60+ languages
- Redesigned the Premium purchase flow: conversion grew from 0.28% to 0.34% in the first 2 weeks after launch (700k visitors/month)
- Rebuilt main user flows (Premium upgrade, connection, server list) without stopping development or doing a full redesign
- Built and maintain the design system for desktop, mobile, and extension
- Use Microsoft Clarity to find where users have problems and check if design decisions work
- Helped new designers join the team and gave structured feedback — design team of 2–3 people
- Presented design solutions at product reviews and stakeholder meetings

Freelancehunt · Product Designer

Dec 2023 — May 2024

- Led UX redesign of the freelancer portfolio page — the main page clients use to decide who to hire (2M+ users)
- Did user interviews and research; used Amplitude and Hotjar to test decisions
- Designed a flexible portfolio builder — freelancers can now choose what to show and in what order, instead of one fixed template
- Worked on the design system; collaborated closely with developers and analysts

Resonance · Product Designer

Mar 2022 — Sep 2023

- Designed interfaces for a financial analytics platform — users work with a lot of data, charts, and real-time numbers
- Redesigned 3 existing tools and designed 2 new ones; built an adaptive chart system
- Created a design system the team still uses 4+ years later — the product grew without a full-time designer after leaving
- Wrote rules for layouts and components; improved how designers, PMs, and developers work together

PINKMAN · Product Designer

Nov 2021 — Feb 2022

- Designed pages with the team; created 3D illustrations for the interface

DARTC · UI/UX Designer

Jun 2021 — Oct 2021

- Designed websites and online stores; created UIKit and documentation for projects
